

Kubernetes Homework

Recap

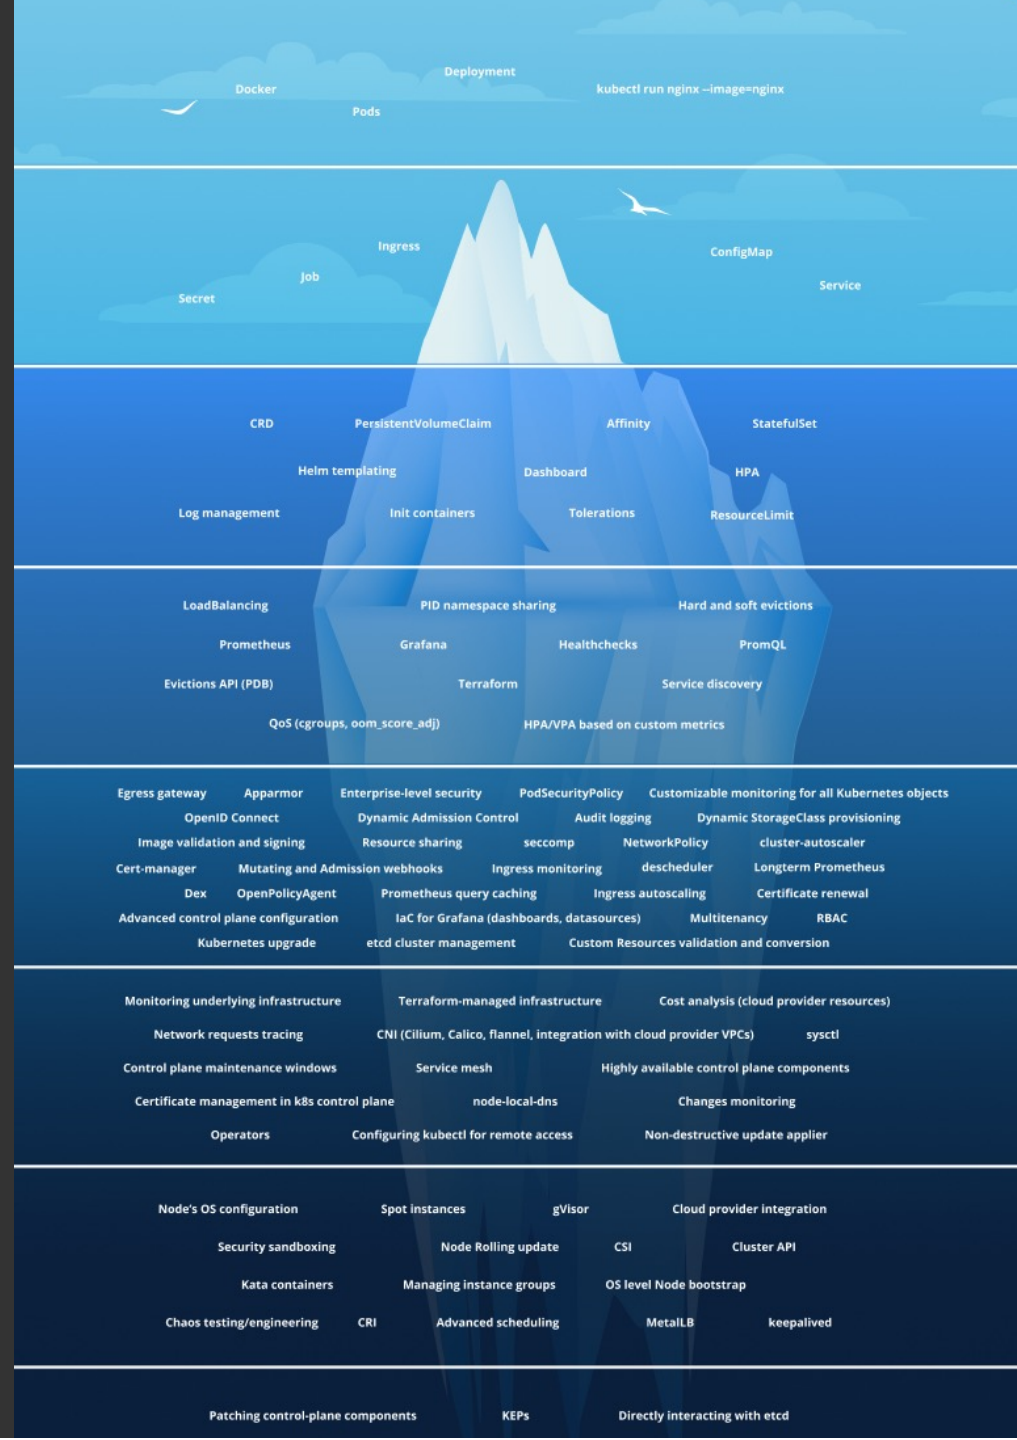

Module 1

1. Introduction to Kubernetes
2. Installing Kubernetes Cluster using Minikube
3. Pods, Namespace, Deployment, ReplicaSet
4. Services
5. Persistent Volumes
6. Stateful Set

Module 2

1. GKE setup with gCloud
2. DB Setup with StatefulSets in GKE
3. Microservice with K8s DNS
4. Ingress Endpoints
5. ConfigMap and Secrets
6. CI/CD with Github Actions

Kubernetes Iceberg

What's Next in K8s

1. Performance Tuning with Goldilock, KRR
2. Networking Policies
3. TLS/SSL Certificates
4. Ingress Host based routing
5. RBAC in K8s
6. External Secrets management
7. HorizontalPodAutoScaler
8. MutatingWebHookConfiguration
9. ValidatingWebHookConfiguration
10. Deploying to Multiple Env with Kustomize or Helm
11. Backup/Recovery in Kubernetes with Velero or Kasten K10
12. Postgres Kubernetes Operators like Kubegres, CNPG
13. Building your own Custom Operators
