

Docker

Homework

Recap

1. Introduction To Docker
2. Docker commands
3. Building Docker images
4. Docker compose
5. Dockerize the Microservice architecture

Homework

1. Build the docker images of basic java applications using Maven.
2. Find different open-source projects, pull those projects and run using docker.
3. Dockerize your own microservice architecture that contains multiple services.
4. Dockerize the kafka messaging queue service and the ELK stack as well inside your microservice.
5. Use Docker-compose to share your applications.
